

Before the little chicks arrived, students read from the chicken book collection & build a coop. Many students had never held a live chicken before!

Students grow plants that attract birds, butterflies and bees, creating birdhouses from recycled materials & bee safe areas. They planted seeds in starter containers & shared with the neighborhood elementary school.

Chicken grant
\$20,000
included
chicken &
cooking
supplies!

The garden - wonder of seeing things grow that most have not ever experienced. Six raised beds located between two staff parking lots.

Where to find grants:
CTA/IFT grants,
KidsGardening.org, Planet
Bee, DonorsChoose

What are your students
interested in? When/how
do students help in the
library & plan library
programs?
