

Whether you're an educator, parent, caretaker, or mentor, we're here with the resources you need to keep expanding possibilities for the students and young adults in your life—even from home.

We've created these viewing guides to help students better engage with our documentaries—all of which are available here for free. These easily printable PDF guides are meant for a wide audience, from middle-school students, all the way up to postsecondary students and career-changers.

The activities in these guides are designed to be completed by students along with their mentors, teachers, or family members, in order to spark meaningful conversations about their aspirations and how to achieve them. But they can also be used by anyone who's looking for guided exposure to new ideas and possible futures.
